

HEALTH, SAFETY AND ENVIRONMENTAL POLICY

At Centaury Minerals, we recognize that safety, health, and the integrity of people are fundamental and non-negotiable values that guide all our operations.

We are committed to providing a safe and healthy work environment to prevent injuries and health deterioration for our employees, contractors, and all individuals working on our behalf.

We acknowledge that excellence in Health and Safety management is critical to the sustainability and efficiency of our business. Our approach is based on a culture of mutual care and interdependence, where each individual is responsible for their own safety and for that of those around them.

To achieve this, we are committed to eliminating hazards and reducing occupational health and safety risks through inspections, preventive measures, and learning from incident investigations. We ensure active consultation and participation of workers at all levels and promote continuous training and operational awareness from the beginning of each workday.

Centaury Minerals operates under a strict principle of environmental and social responsibility. We are committed to complying with all applicable laws and regulations, as well as with commitments undertaken with authorities and local communities. We continuously promote training and awareness among all stakeholders in the implementation of sound environmental practices.

We aim to minimize, mitigate, and compensate for negative environmental impacts during the exploration phase through the efficient use of natural resources. At the same time, we are committed to enhancing the positive social value of our activities by fostering transparent communication channels and contributing to the sustainable development of the communities in which we operate.

Management is responsible for leading the implementation of this policy, and compliance with it is mandatory for all personnel acting on behalf of the Company. This policy serves as the foundation for our continuous improvement process.
